HOW LONG WILL IT TAKE FOR THE IMAGE TO APPEAR ON MY WEB SITE?

The faster your internet connection, the quicker the image will appear! The smaller the file size of the image you upload, the quicker it will appear! When you add an image to Instant Listings, it takes time to send it from your computers to ours. Once our computers have your image, it is automatically optimized for the web and converted into several sizes. This can happen instantly, or take a little time, depending on many factors. If you don't see a image you uploaded, wait a minute or two, and check again!

WHAT TYPE OF IMAGES CAN I UPLOAD?

Note: Instant Listings accepts .JPEG images. It has a unique and powerful built-in image processor that takes y images and converts them automatically to the right size and resolution, so you don't have to worry about it. Pl do not attempt to upload images with file sizes larger than 250KB (250,000 bytes, 1/4 "megabyte", or about 1/6 size of a floppy disk). Large images take much longer to upload, and they aren't necessary because the web is resolution medium. If your file sizes are on average larger than 100KB, you probably need to scan at or convert lower resolution. For more information see our [Frequently Asked Questions](#).
